

**DECLARATION UNDER 37 CFR § 1.47 AND 37 CFR § 1.64
REGARDING NON-SIGNING INVENTOR**

I, Matthew Ward, hereby declare as follows:

1. I am an Australian Registered Patent Attorney and NSW Solicitor, practicing at the firm of Shelston IP in Sydney Australia.
2. Shelston IP, in conjunction with the Intellectual Property Law Office of Joel Voelzke, has responsibility of the prosecution of United States Patent Application Serial No. 10/539,655 entitled AN ELONGATED ELECTRICAL CONDUCTOR THAT IS ADAPTED FOR ELECTRICALLY CONNECTING WITH AN ELECTRICAL CONTACT (the '655 application).
3. On December 16, 2002, a partner of Shelston IP, Jack Redfern, sent a draft copy of the corresponding Australian priority application to John Sinclair, who is one of the named inventors of the '655 application. Attached hereto as **Exhibit 1** is a copy of the email from Mr. Redfern to Mr. Sinclair forwarding the draft application to him and requesting his comments. Certain attorney-client privileged information has been redacted from the exhibit.
4. Mr. Sinclair then provided comments to Mr. Redfern, who incorporated Mr. Sinclair's comments into a revised version of the application.
5. On December 18, 2002, Mr. Redfern sent a copy of the revised application to Mr. Sinclair. Attached hereto as **Exhibit 2** is a copy of the email from Mr. Redfern to Mr. Sinclair forwarding the revised application to Mr. Sinclair for his final approval.
6. Later that same day, after receiving instructions from Mr. Sinclair, Mr. Redfern prepared a final version of the application. Attached hereto as **Exhibit 3** is a copy of the email from Mr. Redfern to Mr. Sinclair forwarding the final version of the application to Mr. Sinclair.
7. Relations with Mr. Sinclair became extremely difficult. Attached collectively as **Exhibit 4** hereto are three emails dated February 23, 24, and 26, 2004 rebuffing an attempt to have Mr. Sinclair sign formal documents, containing various accusations of

1 Dec 08

lies and cowardice; theft of money, patents, and patent attorneys; threats of legal actions, and asking “will I see anything” in response to requests that he sign the formal papers.

8. Attached hereto as **Exhibit 5** is an email thread ending March 2, 2004 containing additional comments and accusations from Mr. Sinclair. In that thread, Mr. Redfern attempted to ascertain whether Mr. Sinclair would sign the formal documents, and stated, “My involvement with the formal documents at this point is simply to determine if you will or will not sign.” Instead of answering that point, Mr. Sinclair asked for the names and phone numbers of the members of the Board of Directors of the client, and made statements such as, “There is so much lying & decite [sic] going on . . . Jack are you sure that you are not be used? be careful not to throw your reputation out the window for a bunch of low lifes . . . ”
9. Attached as **Exhibit 6** hereto is an email from Mr. Sinclair dated March 4, 2004, containing additional exemplary comments from Mr. Sinclair, and signed by Mr. Sinclair as “John Sinclair, 4 times screwed emotional inventor.”
10. On 8 July 2008, I sent an email to Mr Sinclair. In that email, I asked Mr Sinclair to sign an inventors’ declaration, which was also attached to the email. The declaration had previously been executed by the three remaining inventors. A copy of this email, with attachments, is attached hereto as **Exhibit 7**. In that email, I asked Mr. Sinclair specifically, “I presume you are happy to sign this document. However, if you refuse to sign, please let me know at the earliest possible opportunity.”
11. I received a response from Mr Sinclair, and subsequently exchanged several further emails with Mr Sinclair. As demonstrated by the emails, Mr Sinclair refuses to sign the inventors’ declaration. Copies of my most recent emails with Mr. Sinclair, in which Mr. Sinclair refuses to sign the declaration, are attached as **Exhibit 8**. In that email thread, I asked Mr. Sinclair to confirm that, “You are not prepared to sign the declaration,” to which Mr. Sinclair responded, “Thanks again Mattew [sic] I’d say that summarise [sic] it Regards John”.

1 Dec 08

12. Altogether, Mr. Sinclair has rebuffed at least 4 attempts to get him to sign the formal documents, ending with his clear refusal to sign the declaration as demonstrated in Exhibit 8.
13. I am advised that Mr. Sinclair's last known address is:

John Aston Sinclair
Lot 1731 Comboyne
Killback via Wingham, New South Wales 2429
Australia

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. 1001 and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Dated: 1 December, 2008

Dear John

Power and Communications Logistics Pty Limited
Proposed Australian Patent Application
Title: FLEXIBLE ELECTRICAL CONDUCTOR

We refer to your telephone conversation with Jack Redfern earlier today.

The Draft Specification

Please find attached the text of a draft provisional specification for the invention. While the draft has been prepared quickly, we have attempted to include a description of all the important features and functionalities of the preferred embodiments. If there are any commercially significant features that have been omitted, or which require further emphasising, please let us know. You will note that there are a number of comments inserted within the draft where we have explicitly sought your input. If you are not able to provide the information requested the text will be amended into a generic non-limiting form.

The drawings will follow by fax. We did have the drawings scanned to create electronic copies. However, time constraints and patchy quality have meant we have resorted to paper copies.

The Aspects Of The Invention

Presently, the specification includes seven aspects that define the invention in its broadest possible forms. These are directed toward:

1. A conductor having two contact surfaces, the second of which is defined by the plurality of ribs.
2. A conductor having one planar contact surface and one arcuate contact surface.
3. A conduit for an electrical conductor having an opening, and a closure for that opening. (We suspect that it will be necessary to further limit this aspect in light of the disclosure in Figure 19 of US 6,309,229).
4. A conduit for an electrical conductor, where the conductor includes a planar contact surface that is orientated, by the housing, to be inclined with respect to the contact.
5. A conduit for an electrical conductor including a closure for providing a barrier to unintended access to the conductor.
6. A contact that provides a predetermined sequence of engagement between the pins and the conductors.
7. A contact that provides a body that extends along a plane and which defines a contact surface, and a plurality of ribs that extend from the body and back along the surface.

We also propose to include a claim to the method of forming the conductor.

Comments

Rejected

Details

We take this opportunity to confirm the particulars of the inventor and the proposed applicant, which we currently understand are as follows:

INVENTOR

Name: Mr John A Sinclair
Address: Please provide a residential address
Nationality: Australian
Relationship to applicant company: Please provide

APPLICANT

Name: Power and Communications Logistics Pty Limited
Address: c/o- William Buck
Level 24
201 Elizabeth Street
SYDNEY NSW 2000
A.C.N
(if applicable) 102 922 458

Please provide the missing information so that the relevant application papers can be completed.

Where the applicant and the inventor differ, we recommend having a deed of assignment executed to confirm that the inventor has assigned the rights to the invention to the company. If you would like use to prepare such a document, please let us know. We anticipate the cost of doing so will be in the order of \$300. In absence of hearing from you, no action will be taken in this regard.

Closing Comments

We look forward to receiving your comments on the attached draft. If you wish to discuss any of the details please contact me by telephone. In that regard, I shall unfortunately be meeting with another client all this afternoon. However, I should be available at about 5 PM and can be contacted on 0416 180 522. If you require any other assistance please contact one of my partner, Peter Heathcote, or alternatively, my secretary Angelee Yap.

Yours sincerely

Dear John

Power and Communications Logistics Pty Limited
Proposed Australian Patent Application
Title: FLEXIBLE ELECTRICAL CONDUCTOR

We refer to your telephone conversation with Jack Redfern yesterday.

Following your comments on the draft specification, we have prepared a revised draft, which is attached. The changes are shown in marked up format to facilitate your review. Please read the document and let us know if you believe any other amendments or additions are required. We again emphasise the need to ensure that all the functionalities of the invention are described, particularly if those functionalities offer a commercial advantage over existing products.

Copies of Figures 13 and 16 will be sent to you separately by fax.

As instructed, we shall obtain from the USPTO a copy of the Notice of Allowance for US 6,309,229. We understand that you wish to ascertain approximately when the assignee, Universal Power Track Pty Ltd, was aware that the examiner had approved of those claims. We suspect that it will take a couple of weeks to have this information in hand, predominantly due to processing delays within the USPTO.

We look forward to receiving your comments on the attached draft. If you have any comments or enquiries about the language used, please let us know.

Yours sincerely

CONFIRMATION via MAIL

Dear John

Power and Communications Logistics Pty Limited
Proposed Australian Patent Application
Title: FLEXIBLE ELECTRICAL CONDUCTOR

We refer to your telephone conversation with Jack Redfern earlier today.

In accordance with your instructions, the provisional specification has been finalised and will be filed today with IP Australia. The substantive change made to the earlier draft was to remove reference to the exact dimensions of the copper sheet used to produce a specific prior art conductor. As discussed, we understand that many different dimensions are possible in addition to the specific example cited and, as such, there is not much value in providing such a limited sample.

Once the application has been filed, two bound copies of the filed specification will be held at our reception for collection by you either tomorrow or Friday. For reference, a copy of the filed text is attached.

In preparing the patent specification we attempted to include as much detail as possible in the time available. If you subsequently become aware of any areas where additional emphasis becomes necessary, or if you develop additional features and functionalities, please let us know so that possible options can be discussed. If necessary, it is possible to file a second provisional application including additional detail.

The drawings that have been included within the application are informal. However, they should be sufficient to disclose the features of the invention, particularly when read in combination with the text of the specification. If you wish to progress with a complete application, in due course, it will be necessary to have formal drawings prepared.

Given your previous experience in seeking patent protection, we suspect that the above issues are familiar to you. We mention them, however, for the sake of completeness.

The next step will be for IP Australia to allocate a number to the application, and we shall report further once the details are received. It is anticipated there will be a delay of about four weeks.

We shall keep you promptly informed of developments and, in the interim, welcome any comments or enquiries you may have.

Yours sincerely

Subject: RE: The COWARDS

Dear Jack

Well, well, well, I must say what a bunch of Cowards making you contact me, they do not have the balls to do it themselves. I have no problem with you, you are a good guy just doing his job.

They stole the patents from me and now they want me, to help them, steal it from me again, they are as bad as Clipsal, actually they are much worse.

I will not go into all the details of what it is they have done as I am sure you do not want to be bothered with it but I will be taking legal action against them you can inform them of that.

Please explain to the cowards that if they want me to do anything for them, then have the balls to contact me themselves, you have my email address, so I am sure they have.

I have not forgotten our lunch and we will have it one day, it will be on a friendship basis not business.

Take care of yourself and be careful of these people as they are not to be trusted

Best regards

John Sinclair

Hi Jack,
Few questions first

Just how critical is it that I sign these documents? what is the progress of the company are they manufacturing? will I see anything from it? please answer these questions before I give any of my details.

Why are they getting you to do this? this is not your issue. I would like to know which one of them has the balls to contact me..... do they feel that guilty that they can not even write me an email?

Regards
John

Subject: Be Careful

Dear Jack (patent attorney
for Power Communication Logistics)

I have not heard from anyone in 2 days does this mean they have no balls....or are they just trying to find out where I am, and using you to do it?

I am sure you have advised PCL of what can happen in relation to countries like the USA and others when you do not have the inventors permission?

If they think I do not have funds to take legal action then lets wait and seeit is a matter of timing? it will happen, the question is will they inform the people they are ripping off at the moment.

Jack these people are BAD people Mike McDermott is being sort after by people in Saudi Arabia for taking \$US40,000 off a company there. This is the same company that Robert Wachio took \$US600,000 from. The people that they took the money from have now had to sell up, and do you think that McDipshit or Montgomery care about them. The company name is Al Sawah and the victims names are Abu Baker & his brother Hussain. These people are good people and work on honesty unlike McDipshit & Montgomery, Check it outin case you believe McDipshit's lies, which he does a lot of.

Jake I give you fair warning..... make sure you get paid up front before you proceed with PCT or national stage. I tried to warn the people in Saudi Arabia about Robert and they would not listen to me, I hope you are not as silly..... I do speak the truth. As for the money that McDipshit took I did not know about it until after they stole my product from me.

A rich man who steals from a poor man in my book is no different to a child molester they are the lowest form of human bean.

Give my regards to Greg Turner if you see himI keep losing my patent attorneys and it is wrong..... not only do they steal my work & patents but you as well..... are there any ethics or morals in Australia?

I have Cc this letter to thein PCL and the other people involved with Clipsal who also stole my product from me, this is so you dont have to worry about keeping it confidential and they know legal action is pending

Take care of yourself sorry for all the BS you are going through I will not bother you again, please if you wish to keep in touch I have no problem as long as it is not related to low life people

Subject: RE: Be VERY Careful

Hi Jack

Please supply phone no.s and names of directors of Power & Data Corporation Pty Ltd.

As for being a shareholder and receiving information from PLC this is BS as no shares were issued in the company to me?

Have you informed P&D Corporation that legal proceedings are pending and that any funds they are spending will be lost?

My suggestion to them is to start legal action against McDermott for Fraud I will contact them after you supply me the ph No. and inform them of the truth.(I suspect that the CEO does know me)

There is so much lying & decite going on that I find it hard to believe that anyone would take on such a project without contacting me.....this would be very stupid for any profesional person.

Jack are you sure that you are not being used? be careful not to throw your reputation out the window for a bunch of low lifes who, in the end will screw you and not think twice about doing so?

I await your responce with the contact details

Regards

Sent: Thursday, 4 March 2004 8:24 PM
To: jackredfern@bswip.com.au
Subject: WHY JACK?

What's up Jack..... no response..... I thought that it would be easy to tell me who the directors are.....I suspect you are having a few problems? It seems surprising that this company was set up 1 month after they (PCL) ripped me off.

Jack I would hate to think you are lying to me and trying to con me, I have very little faith in Australian Business and law as it is. My suspicion is that people are lying to you, (I know these people) and you are unaware that they are lying to you I pray that this is the case.

Jack..... do you understand what it is like to have your life's work taken from you, can you imagine what your life would be like if someone conned you and took away your engineering career and patent attorney appointment and everything elsewhat would you do....work for Woolworth's or Coles packing boxes? What would happen to your family. Can you imagine how you would feel if you were totally innocent.... but because the person who took everything away from you had more money, and lied exceptionally well, everyone believed them?..... Can you imagine what it would be like knowing that these people had planned your demise & intentionally kept you broke so that you could not afford to take legal action..... Can you imagine what it would be like if you had done everything right by these people given them all that they asked for and more...they had promised you they were sincere.... you had given them the chance.....Can you imagine what it would be like if you had put every cent you had into a project & that you and your family had to miss out on the good things in life. You had explained to your family and assured them that the sacrifices they made would pay off for them in the future..... then you lost everything through this persons lying and deceit and you and your family sacrifices were for nothing. Can you understand this?

When you understand the above you will see why my emotions run over as would any bodies.... this has happened to me not once but 4 times in Australia. Is it any wonder that Australian inventors go overseas? It would appear that if you have money then it is legal to steal and the law supports this. Is law in Australia only for the richif you have no money then you are not entitled to the law..... as you can not afford a lawyer.... so you are guilty because you have no money.

Why is it Jack that you are allowed to specialize in your profession and you can concentrate on that profession and become good at it. Where as an inventor is expected not only concentrate on his profession but he also has to be a corporate lawyer, a patent expert a manufacturing expert an engineer and many other professions? who else in this world can do all these professions that an inventor is expected to be.

Why is it Jack that as patent attorneys you know thisand still no one is prepared in your industry to do anything to help the inventor? You make millions of dollars out of inventors. Everything is against the inventor, the law the patent attorneys the business community. Do you people take pleasure in seeing people who put their entire life into a project get screwed, and drive them to the point of suicide. Is this something you enjoy?

Why is it that no body has the balls in your profession to do something about it. After all your profession is dependant on inventors, yet you do nothing to protect them.....if someone offers you money you throw all ethics and morals out the window.....I think it is a disgrace.

If all Australian inventor go overseas what are you, as patent attorneys going to do for a living? and imagine how much more money you would be making if they all stayed in Australia? all the good inventors who are successful go overseas this has been proven time and time again, and the inventors who are successful that I know of all have similar stories as mine from Australia. e.g. Cobra car alarm, Triton work bench, Adaptor Flex and many more.....so why is it that your profession does nothing?

Jack if I do not hear from you about the directors of this company P&DC I will assume you are working in collaboration with them, if the company Power & Data Corporation Pty Limited are genuine then you should have already responded to my question? It is not that hard a question..... if they are sincere..... Perhaps they are busy now changing names.... this can also be checked.

Why did you Cc your last email to PCL's competitors the people who stole my patents from me before PCL are they involved in Power & Data Corporation?

Regards

John Sinclair
4 times screwed
emotional inventor

Our Ref: 37571USP00

Dear Mr Sinclair

United States Patent Application No. 10/539655
Power & Communications Logistics Pty Limited
Title: An Elongate Electrical Conductor that is Adapted
for Electrically Connecting with an Electrical Contact

I am assisting Jack Redfern with this matter.

As you know, you have been named as an inventor in respect to the above US patent application. Please find attached an inventors' Declaration for your execution.

I presume you are happy to sign this document. However, if you refuse to sign, please let me know at the earliest possible opportunity.

Any comments or enquiries you may have are welcomed.

Yours sincerely
Shelston IP

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Attorney Docket No. : 123-003
First Named Inventor: : John Ashton SINCLAIR
Application No. : 10/539,655
Filing Date : June 14, 2005
Art Unit :
Examiner's Name: :
Customer Number: : 47533

**DECLARATION FOR UTILITY OR DESIGN PATENT APPLICATION,
AND POWER OF ATTORNEY (WITH AUTHORIZATION RE AGENT)**

Declaration Submitted with
Initial Filing *OR* Declaration Submitted after
Initial Filing (surcharge (37 CFR 1.16(e))
required)

As a below named inventor, I hereby declare that:

Each inventor's residence, mailing address, and citizenship are as stated below next to his/her name.

I believe the inventor(s) named below to be the original and first inventor(s) of the subject matter which is claimed and for which a patent is sought on the invention entitled **AN ELONGATED ELECTRICAL CONDUCTOR THAT IS ADAPTED FOR ELECTRICALLY CONNECTING WITH AN ELECTRICAL CONTACT**, the specification of which:

is attached hereto
OR
 was filed on June 14, 2005 as U.S. Application No. 10/539,655
 and was amended on _____ (if applicable)

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment specifically referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56, including for continuation-in-part applications, material information which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

CLAIM FOR FOREIGN PRIORITY

I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b) of any foreign application(s) for patent, inventor's or plant breeder's rights certificate(s), or 365(a) of any PCT international application which designated at least one country other than the United States of America, listed below and have also identified below, by checking the box, any foreign application for patent, inventor's or plant breeder's rights certificate(s), or of any PCT international application having a filing date before that of the application on which priority is claimed.

| Prior Foreign Application Number(s) | Country | Foreign Priority Date (MM/DD/YY) | Priority Claimed? |
|-------------------------------------|-----------|----------------------------------|-------------------|
| 2002953429 | Australia | 12/18/2002 | Yes |
| AU2003001691 | PCT | 12/18/2003 | Yes |
| | | | |

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that

willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. 1001 and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

POWER OF ATTORNEY

I appoint the following as my attorneys with full power of substitution and revocation, to prosecute said application and all continuations, continuations-in-part, and divisional applications associated therewith, and to transact in connection therewith all business in the Patent and Trademark Office and before competent international Authorities:

The attorneys associated with PTO Customer No. 47533

Please address all correspondence to:

Joel D. Voelzke
 INTELLECTUAL PROPERTY LAW OFFICE OF JOEL D. VOELZKE
 400 Corporate Pointe, Suite 300
 Culver City, California 90230
 Telephone: (310) 590-4525
 Facsimile: (310) 590-4526

Wherefore I pray that Letters Patent be granted to me for the invention or discovery described and claimed in the foregoing specification and claims, and I hereby subscribe my name to the foregoing specification and claims, declaration, power of attorney, and this petition.

Hi John,

I'd ideally like at least to get some form of closure in the short terms, if possible, just so I know where we all stand. Can I summarise the position as follows?

- * You dispute the accuracy of the declaration, for the reasons discussed below.
- * For those reasons, you are not present prepared to sign the declaration.
- * You are open to the possibility of negotiating with my client..

Does this accurately reflect where we stand at the present moment?

Regards,
